LIST OF CONTENTS

NUMBER 1

Announcement	i	
J. Guillet, A. Maazouz et J. F. May	1	Propriétés rhéologiques à l'état fondu de polyesters thermoplastiques chargés de fibres de verre
G. Kaszás, T. Földes-Berezsnich and F. Tüdős	7	Kinetics of radical polymerization—XLVII. Molecular mass and polydispersity in the inhibited polymerization
A. Munardi, R. Aznar, N. Theophilou, J. Sledz, F. Schué and H. Naarmann	11	Morphology of polyacetylene produced in the presence of the soluble catalyst $Ti(OnBu)_4$–*n*-BuLi
N. Theophilou, A. Munardi, R. Aznar, J. Sledz, F. Schué and H. Naarmann	15	Polymerization of acetylene in the presence of a tungsten-based catalyst, and geometric structure, electrical properties and morphology of the polymer
Hendra Satyo, Thomas Stelter and Jürgen Springer	21	Photodegradation of poly-5-bromoacenaphthylene
T. Hamaide, A. Revillon et A. Guyot	27	Réactivité des macromonomères styréniques du polyoxyéthylène en transfert radicalaire
N. A. Weir and J. Arct	33	Reactions of methyl radicals with poly(vinylacetophenone) during photolysis
Wayne W. Y. Lau, Charles M. Burns and Robert Y. M. Huang	37	Interaction parameters in mixtures of polystyrene–poly(methyl methacrylate)–toluene
V. T. Truong, D. R. G. Williams and P. E. M. Allen	41	The effect of molecular properties on the mechanical behaviour of PMMA—II. Environmental stress cracking in methanol
L. A. Chandler M. M. Hirschler and G. F. Smith	51	A heated tube furnace test for the emission of acid gas from PVC wire coating materials: effects of experimental procedures and mechanistic considerations
Franco M. Rabagliati and Jesus M. Contreras	63	Epoxide polymerization—IX. Styrene oxide polymerization using the diphenylzinc–water system in benzene at various temperatures
Cristofor I. Simionescu, Silvia Ioan and Bogdan C. Simionescu	69	Solution properties of ultra-high molecular weight polymers—13. Viscosity–molecular weight relationships and unperturbed dimensions of poly(butyl methacrylate) in various solvents
P. P. Shah and H. B. Naik	73	Poly[2-methoxy-4,6-di(*p*,*p*′-isopropylidine diphenyloxy)-*s*-triazine] in solution. Treatment of viscometric data according to the theories of intrinsic viscosity of rigid-chain polymers
M. J. Seurin et P. Sixou	77	Comportement des solutions d'hydroxypropylcellulose en présence d'un sel inorganique
Manjeet Bhatia, P. Bajaj and R. B. Chavan	89	Structural investigation of the saponified products of acrylonitrile terpolymer by PMR and CMR spectroscopy

NUMBER 2

J. C. Bevington, T. N. Huckerby, M. G. Liu and F. G. Thorpe	95	The involvement of 2-vinylthiophene and 2-styrylthiophene in the radical polymerization of methyl methacrylate

T. Hammond and R. S. Lehrle 99 Long-term behaviour of molten polyethylene as a high-temperature stationary liquid phase for GLC suggests preferential scission at branch points

R. S. Davidson, R. J. Ellis, S. A. Wilkinson and C. A. Summersgill 105 A study of the polymerization of acrylates using electron beam radiation

L. H. Tagle and F. R. Diaz 109 Polymerization by phase transfer catalysis—5. Polycarbonates from diphenols with aromatic side groups

A. Laguerre, J. C. Rabadeux, H. Gueniffey et C M. Bruneau 113 Fixation de lysine par sa fonction αNH_2 sur chaîne oligométhacrylique

J. K. Kallitsis and N. K. Kalfoglou 117 Physical characterization of blends of isotactic poly(butene-1) with ethylene–propylene copolymer

I. Mondragon, P. M. Remiro and J. Nazábal 125 Exchange reactions on polyarylate–phenoxy blends: their influence on the physical and mechanical behaviour

G. Spiliopoulos, M. Statheropoulos and G. Parissakis 129 Mass spectrometric study of the stabilization of PVC with Ba/Cd stearates and dibasic lead phosphite

A. Gozlan and A. Zilkha 133 Electrochemical polymerization of dicarboxylic acids—III. Quantitative results in the electrolysis of adipic acid

A. Gozlan and A. Zilkha 143 Electrochemical polymerization of dicarboxylic acids—IV. Polymerization of sebacic acid

A. F. Shaaban, M. A. Salem and N. N. Messiha 153 Unsaturated polyesters—IV. Kinetics of polyesterification of cinnamylsuccinic acid with 1,4-tetramethylene glycol

H. G. Patel, R. M. Patel and S. R. Patel 159 Polyesters—1. Polycondensation of 4,4′-dichloromethyldiphenyl ether with sodium adipate, sebacate and terephthalate and characterization of polyetheresters

Ibrahim K. Ahmed, Ja'afar K. Jawad and Mohammad A. M. Rashied 163 Synthesis of some polyarenyl platinum ethers by using phase transfer catalysis

Jayashree Bijwe, Pramod S. Pandey, Padma Vasudevan and Anita Tripathi 167 Electrical properties of iron phthalocyanine systems with a mixed valenced central iron atom

Short Communications

I. M. Fraser and J. R. MacCallum 171 Optical anisotropy of excimer emission from solutions of polystyrene

J. V. Dawkins, S. A. Shakir and T. G. Croucher 173 Non-aqueous poly(methyl methacrylate) dispersions: radical dispersion polymerization in the presence of the diblock copolymer poly(styrene-b-methyl methacrylate)

C. Price and R. B. Stubbersfield 177 Solubilisation of homopolystyrenes by micelles formed by a polystyrene-b-poly(ethylene/propylene) copolymer in a base lubricating oil

Announcement i

NUMBER 3

Van Tan Truong, P. E. M. Allen and D. R. G. Williams 181 The effect of molecular properties on mechanical behaviour of PMMA—III. Environmental stress crazing in methanol

T. N. Khan, R. H. Mobbs, C. Price, J. R. Quintana and R. B. Stubbersfield 191 Synthesis and colloidal behaviour of a polystyrene-b-poly(ethylene oxide) block copolymer

S. Roe and D. C. Sherrington 195 Hysteresis-like behaviour in the swelling/deswelling of polystyrene based crosslinked resins using acetone/water mixtures

Abdenbi Lekchiri, Joëlle Morcellet and Michel Morcellet 201 Spectroscopic study of the complexes of poly(ϵN-methacryloyl-L-lysine) and its model molecule with nickel(II)

H. N. Subramanyam and S. V. Subramanyam 207 Thermal expansion of irradiated polyoxymethylene

L. D'Ilario, P. Benni, E. Cernia, M. Lupoli, E. Mantovani, M. Schwarz and A. Zanobi 213 Reversibility of the doping of polyacetylene with iodine in the gas phase

Sergio Brückner and Silvia Luzzati 217 Crystalline isotactic *trans*-1,4-poly(1,3-pentadiene). Explanation of a stress-induced conformational transition

Marc J. M. Abadie et Loekman Satibi 223 Étude des propriétés de polycondensats à base de polybutadiènes hydroxytélécheliques (PBHT)

R. D. Patel, H. S. Patel and S. R. Patel 229 Co-ordination polymers of bis(8-hydroxy-5-quinolylmethylene) sulphide (BHQS)

F. Epaillard, J. C. Brosse et G. Legeay 233 Polymérisation de monomères organiques dans des plasmas froids—V. Polymérisation de monomères acryliques en présence d'amorceurs et de coamorceurs

J. Stehlíček and J. Šebenda 237 Anionic polymerization of ϵ-caprolactam—LX. Ionization and solvation changes in the initial stage of the anionic polymerization of lactams in tetrahydrofuran

J. Schmelzer and J. Springer 243 Production and properties of polyacenaphthylene—VI. Influence of polymerization conditions on chain structure

Navin Chand and P. K. Rohatgi 249 Tensile and impact behaviour of chopped sunhemp–polyester composites

Short Communications

C. A. Barson and J. C. Bevington 251 Copolymerizations involving methyl methacrylate, methyl acrylate, stilbene and p.fluorostilbene

Annick Bozzi and Adolphe Chapiro 255 The nature of the initiating centres for grafting in air-irradiated perfluoro polymers

Announcement i

NUMBER 4

I Dedication to Professor Maurice Stacey F.R.S. on the occasion of his 80th birthday

R. Schaller, M. G. Martl and K. Hummel 259 Comparative studies of photocrosslinking of a butadiene–styrene copolymer without and with a magnetic field

F. Pilati, A. Munari, P. Manaresi, G. Milani and V. Bonora 265 Linear and branched poly(butylene isophthalate): synthesis and molecular characterization

V

Brigitte Silinski, Claude Kuzmycz and Albert Gourdenne 273 Synthesis under microwaves (2.45 GHz) of polyurethane polymers—I. Model study from diisocyanate and polyethertriol prepolymers

A. Crespy, B. Joncour, J. P. Prevost, J. P. Cavrot et C. Caze 279 Étude de la compatibilité d'un système polyamide/phase caoutchoutique modifiée par l'anhydride maléique—I. Étude de la modification de la phase caoutchoutique par l'anhydride maléique

Henry Agbaje and Jürgen Springer 283 Production and properties of polyacenaphthylene—VII. Unperturbed dimensions and chain conformational studies of polyacenaphthylene

Costas Methenitis, Joëlle Morcellet et Michel Morcellet 287 Propriétés complexantes de polyélectrolytes dérivés des acides aspartique et glutamique

Jan Jager and Jan B. F. N. Engberts 295 Conformational behaviour of copolymers of acrylic acid and methacrylic acid in aqueous solution

B. Boutevin, Y. Pietrasanta, J. Conan et R. Vera 301 Réalisation de mousses de polyuréthanne rigide pour revêtements ignifuges résistants à l'eau

P. B. Arora, H. S. Patel and S. R. Patel 307 Resacetophenone–furfural polymers

G. Manivannan and P. Maruthamuthu 311 Peroxo salts as initiators of vinyl polymerization—III. Polymerization of acrylonitrile initiated by the peroxomonosulphate–Co(II) redox system

S. H. Goh and S. Y. Lee 315 Miscibility of poly(2,6-dimethyl-1,4-phenylene oxide) with styrene–2,2,6,6-tetramethylpiperidinyl methacrylate copolymers

E. F. Okieimen 319 Studies on the graft copolymerization of cellulosic materials

Hideharu Ushiki, Fumihiko Tanaka and Shinji Sakanoue 323 Study on the polymer-induced coil–globule transition. Intramacromolecular self-quenching rates of anthryl groups attached to a polymer side chain

Saburo Akiyama, Hideharu Ushiki, Yoshihisa Kano and Yasuaki Kitazaki 327 Adhesive polymer. Fluorescence depolarizations of chromophores in adhesive agent on poly(ethylene terephthalate) base film

Z. Vymazal, K. Volka, Z. Vymazalová, L. Mastný and M. W. Sabaa 331 Effect of stabilizers in the thermal treatment of PVC—XVIII. Action of calcium stearate

NUMBER 5

F. J. de las Nieves López and R. Hidalgo-Alvarez 337 Electroconduction and electrokinetic parameters of ionic plugs. Comparison between theoretical and experimental values

Lubomír Šimek and Miloslav Bohdanecký 343 Estimation of the polymer–solvent interaction parameters for polyesters of aliphatic acids

E. Pierri and A. Dondos 347 Viscometric determination of the two critical concentrations of polymers in solution

J. Chauchard, B. Chabert, G. Nemoz et P. Jeanne 353 Influence du mode de préparation (avec et sans solvant) sur le comportement rhéologique d'une matrice polyépoxyde

T. Hatakeyama, A. Yamauchi and H. Hatakeyama 361 Effect of thermal hysteresis on structural change of water restrained in poly(vinyl alcohol) pseudo-gel

J. A. Bousquet and J. P. Fouassier 367 Photo-oxidation of a random styrene–butadiene copolymer: role of hydroperoxides and behaviour of butenyl segments

V. Špaček, J. Pouchlý and J. Biroš 377 The kinetics of model reactions of curing epoxy resins with amines

K. Schwetlick, J. Pionteck, T. König and W. D. Habicher 383 Organophosphorus antioxidants—VIII. Kinetics and mechanism of the reaction of organic phosphites with peroxyl radicals

Surekha R. Patel, Hasmukh S. Patel and Shanti R. Patel 389 Synthesis and characterization of keto-sulphide resins

A. Gozlan and A. Zilkha 393 Electrochemical polymerization of dicarboxylic acids—V. Effect of chain length between the carboxyl groups

Mayur Patel and Bhikhu Suthar 399 Interpenetrating polymer networks from castor oil based polyurethanes and poly(methyl acrylate)—IV

Costas Methenitis, Joëlle Morcellet and Michel Morcellet 403 Circular dichroism study of palladium(II) complexes with some optically active polyacids

K. Ito 409 Auto-acceleration of radical polymerization rate in polymerization of styrene under the condition of predominant transfer

NUMBER 6

B. Boutevin, Y. Pietrasanta et J. J. Robin 415 Matériaux composites à base de graves et de liants polymères—V. Étude d'un nouveau liant à base de bitume et de polyéthylène ozonisé

Marc J. M. Abadie et Loeckman Satibi 423 Synthèse de polybutadiènes à extremités hydroxyles

C. Guery, M. Viguier et A. Commeyras 433 Monomère acrylique fluoré. Synthèse à partir d'un époxyde fluoré, catalysée par la triphényl phosphine

G. Bauduin, J. Mouanda, M. Taha, M. Sergent, D. Mathieu et R. Phan Tan Luu 441 Mise au point d'un nouveau béton léger de polystyrène expansé—I: étude des constituants principaux

G. Bauduin, J. Mouanda, M. Taha, D. Mathieu, R. Phan Tan Luu et M. Sergent 447 Mise au point d'un nouveau béton léger de polystyrène expansé—II: études des additifs

P. Raby, F. Heatley, R. H. Mobbs, C. Price and R. B. Stubbersfield 455 Nuclear magnetic relaxation studies of globular particles formed by the association of lithium polystyrene carboxylate

David S. Brown, John V. Dawkins, Angela S. Farnell and Graham Taylor 463 Study of micelle formation by the diblock copolymer poly(styrene-*b*–dimethyl siloxane) in *n*-dodecane by small angle X-ray scattering

E. Pérez, J. G. Fatou and A. Bello 469 Study of the melting process in polyoxetanes

T. Sato, M. Oka, H. Tanaka and T. Ota 475 Long-lived polymer radicals in the polymerization of *N*-methylmethacrylamide in cyclohexane

A. Mantecón, V. Cádiz, A. Serra and P. A. Martínez 481 Curing of *N,N'*-diglycidylimides with polyfunctional compounds

N. Somanathan, R. Sanjeevi, C. Rami Reddy and N. Radhakrishnan 489 Graft co-polymerization of casein with acrylonitrile and *n*-butyl methacrylate

Premamoy Ghosh, Arabinda Sekhar Bhattacharyya and Somnath Maitra — 493 Studies on the kinetics of dehydrochlorination of poly(vinyl chloride) in solution induced by a weak base

Short Communication

J. C. Bevington and G. Ayrey — 497 The reactions of 2-vinylnaphthalene and 4-vinylbiphenyl with the benzoyloxy radical

NUMBER 7

J. Coudane et M. Vert — 501 Polyacides amiques et polyimides dérivés de l'anhydride amino-4 phtalique

A. Petit, M. T. Cung et J. Néel — 507 Étude de la composition et de la microstructure de copolymères radicalaires vinyl-4 pyridine–styrène par RMN ^{1}H et ^{13}C

A. Gozlan and A. Zilkha — 515 Electrochemical polymerization of dicarboxylic acids—VI. Mechanism of polymerization

B. Boutevin, Y. Pietrasanta et J. J. Robin — 525 Matériaux composites à base de graves et de liants polymères—VI. Étude des enrobés à base de liant bitume–polyéthylène ozonisé et de granulats minéraux

Jean-Pierre Mendy, Christian Larchet, Pierre Schaetzel and Bernard Auclair — 533 Méthode de détermination de l'exclusion d'un electrolyte fort par une membrane échangeuse d'ions

J. Pigłowski — 541 Mischungsverhalten von Polyvinylchlorid und Polyepichlorhydrin

S. Shaw and R. P. Singh — 547 Study of compatibility of polystyrene with ethylene–propylene–diene rubber

J. L. Nieto, J. Baselga, I. Hernandez-Fuentes, M. A. Llorente and I. F. Piérola — 551 Polyacrylamide networks. Kinetic and structural studies by high field ^{1}H-NMR with polymerization *in situ*

D. S. Ogunniyi — 557 Stress relaxation studies of Viton GF fluoroelastomer vulcanizates

M. Chater and J. M. Vergnaud — 563 Effect of kinetic and thermal parameters on the process of cure of epoxy resin in a cylindrical mould

L. Gargallo, E. Soto, F. R. Díaz, L. H. Tagle and D. Radić — 571 Some aspects of the solution properties and chain flexibility of poly[2,2-propane-bis(4-phenylthiocarbonate)]

Short Communication

J. G. Deshmukh, M. H. Jagdale, R. B. Mane, M. M. Salunkhe and P. P. Wadgaonkar — 577 Oxidation of organic compounds by polymer-supported bromate ion

NUMBER 8

Jan Jager and Jan B. F. N. Engberts — 579 Effects of aqueous non-electrolytes on the compact coil → random coil conformational transition of poly(methacrylic acid)

V. Louvet, H. Handel, P. Appriou et R. Guglielmetti — 585 Tétraazamacrocycles greffés sur polymère, synthèse et propriétés complexantes

Barbara D. Barr-Howell and Nikolaos A. Peppas 591 Structural analysis of poly(2-hydroxyethyl methacrylate) microparticles

Van Tan Truong, P. E. M. Allen and D. R. G. Williams 595 The effect of molecular properties on the mechanical behaviour of PMMA—IV. The role of chain entanglements in fracture processes

Joseph Selb and Robert Jérôme 603 Reactions of organolithium compounds with poly(vinyl chloride), poly(methyl methacrylate) and poly(styrene-co-acrylonitrile) as labelling pathways with fluorescent chromophores

C. M. Kok 611 The effects of compounding variables on the reversion process in the sulphur vulcanization of natural rubber

Françoise M. Winnik and Christopher K. Ober 617 Coloured particles by dispersion polymerization

Yu. A. Shlyapnikov and A. P. Mar'in 623 New phenomena observed on dissolution of low-molecular compounds in polymers. The sorption isotherms

Yu. A. Shlyapnikov and A. P. Mar'in 629 New phenomena observed on dissolution of low-molecular compounds in polymers. Antioxidant solubility

Yu. A. Shlyapnikov and N. N. Kolesnikova 633 Interaction kinetics of peroxides and organic sulphides in atactic polypropylene

S. Varbanov, G. Agopian and G. Borisov 639 Polyurethane foams based on dimethylaminomethylphosphine oxide adducts with ethylene and propylene oxides

Yoshio Utena, Hirofumi Yajima, Tadahiro Ishii and Takahashi Handa 643 Excimer emission in protonated pyridine systems—4. Effect of molecular weight on dimer-like excimer formation of poly-2-vinylpyridine in rigid glass solution in the presence of trifluoroacetic acid at 77 K

Short Communications

C. Price, E. K. M. Chan and R. B. Stubbersfield 649 The effect of block length on the thermodynamic stability of micelles formed by polystyrene-*block*-polyisoprene copolymers in *n*-hexadecane

T. Hammond and R. S. Lehrle 653 The thermal degradation of poly(acenaphthylene)

Announcement i

NUMBER 9

D. Derouet, T. Piatti et J. C. Brosse 657 Synthèse de polyesters phosphoriques supports de molécules actives—II. Étude de la polycondensation de monomères du type phosphorodichloridate de 0-alkyle (ou 0-aryle) avec les diols $\alpha\omega$-linéaires non aromatiques

F. M. Galloway and M. M. Hirschler 667 Hydrogen chloride release from poly(vinyl chloride): model for its decay

L. A. Chandler and M. M. Hirschler 677 Further chlorination of poly(vinyl chloride): effects on flammability and smoke production tendency

V. F. Kurenkov, M. N. Trifonova and V. A. Myagchenkov 685 Peculiarities of the inverse emulsion polymerization of acrylamide in the presence of hydrolyzing agent and persulphate–tris-(2-carbamoylethyl) amine initiator

C. I. Simionescu, Geta David and M. Grigoras 689 Ring-opening isomerization polymerization of 2-methyl-2-oxazoline initiated by charge transfer complexes
